

**Smt. E. E. VAZ (Minister of State for Primary and Secondary Education).—**

I wish to make the following statement:

The Centre at T. B. Dam High School had to be cancelled as the total number of candidates taking the examination was only 192. According to the decision of the Karnataka Secondary Education Examination Board, there should be generally a minimum strength of 300 for a Centre.

High School, T. B. Dam has been deleted from S. M. B. High School Centre at Kampli and it is now attached to Municipal High School Centre, Hospet which is only a few miles from the Dam site.

**ಶ್ರೀ ಬಿ. ಸತ್ಯನಾರಾಯಣಸಿಂಗ್ :—**ಮಾನ್ಯ ಮಂತ್ರಿಗಳು ಈಗ ಇದಕ್ಕೆ ಕನಿಷ್ಠ ಸಂಖ್ಯೆ 300 ವಿದ್ಯಾರ್ಥಿಗಳು ಬೇಕು ಎಂದು ಹೇಳುತ್ತಾರೆ. ಈ ಸೆಂಟರ್‌ನಲ್ಲಿ ಎಲ್ಲಾ ಸಾಲಭ್ಯಗಳು ಇವೆ. ೧೯೭೨ ವಿದ್ಯಾರ್ಥಿಗಳು ಸೆಂಟರ್‌ನಲ್ಲಿರುವುದರಿಂದ, ಸುತ್ತಮುತ್ತ ರಾಲೆಗಳನ್ನು ಸೇರಿಸಿ ಈ ಸೆಂಟರ್‌ನ್ನು ಮುಂದುವರಿಸುವುದಕ್ಕೆ ಸಾಧ್ಯತೆಯನ್ನು ಪರಿಶೀಲಿಸುತ್ತೀರಾ ?

**ಶ್ರೀಮತಿ ಇ. ಇ. ವಾಜ್ :—**ಈ ಒಂದು ಸೆಂಟರ್‌ನಲ್ಲಿ ಮೂರು ಹೈಸ್ಕೂಲುಗಳ ಮಕ್ಕಳು ಅಂದರೆ, ಟಿ. ಬಿ. ಡ್ಯಾಂ. ಹೈಸ್ಕೂಲಿನ ೧೦೧ ಮಕ್ಕಳು, ವಿಜಯನಗರ ಹೈಸ್ಕೂಲಿನ ೪೫ ಮಕ್ಕಳು ಮತ್ತು ಮಾಯಮ್ಮನಹಳ್ಳಿ ಹೈಸ್ಕೂಲಿನ ೩೬ ಮಕ್ಕಳು ಇದ್ದವು. ಇವರಿಗೆ ಒಂದು ಸೆಂಟರ್ ಇತ್ತು. ಆದರೆ ಮಾಯಮ್ಮನಹಳ್ಳಿ ಹೈಸ್ಕೂಲು ಮಕ್ಕಳಿಗೆ ಈ ಸೆಂಟರ್ ಕೊಟ್ಟರೆ ತೊಂದರೆಯಾಗುತ್ತದೆ. ಅದಕ್ಕೆ ಬದಲು ಹಗರಿಬೊಮ್ಮನಹಳ್ಳಿ ಸೆಂಟರ್ ಕೊಟ್ಟರೆ, ಅಲ್ಲಿ ರೋಡ ಟ್ರಾನ್ಸ್‌ಫೋರ್ಮರ್ ಸರ್ವಿಸ್ ಜೆನ್ಯಾಗಿ ಇರುತ್ತದೆ ಎಂದು ಹೇಳಿದ್ದರಿಂದ ಆ ಮಕ್ಕಳನ್ನು ಈ ಸೆಂಟರಿನಿಂದ ತೆಗೆದರೆ, ಆಗ ೧೫೬ ಮಕ್ಕಳು ಮಾತ್ರ ಇರುತ್ತಾರೆ. ಅವರಿಗೆ ಒಂದು ಸೆಂಟರ್ ಕೊಡಲಿಕ್ಕೆ ಸಾಧ್ಯವಿಲ್ಲ. ಈಗ ಹಣಕಾಸಿನ ತುರ್ತು ಪರಿಸ್ಥಿತಿ ಇರುವುದರಿಂದ ಅದನ್ನು ಕಡಿಮೆ ವಿರ್ಚಮಾಡಬೇಕು ಎನ್ನುವ ಉದ್ದೇಶದಿಂದ ಈ ಸೆಂಟರ್‌ನ್ನು ಒಂದ್ ಮಾಡಿ, ಆ ಹೊಸದಾಗಿ ಹೊಸವೇಟೆ ಸೆಂಟರ್ ಕೊಟ್ಟಿದ್ದೇವೆ.

(ii) *Re: Scarcity of Drinking Water in some villages of Davangere Taluka.*

**Smt. NAGAMMA C. KESHAVAMURTHY (Davangere) :**

I call the attention of the Minister for Health to the scarcity of drinking water in some villages of Davangere Taluk.

**Sri H. SIDDAVEERAPPA (Minister for Health) :**

I make the following statement :

Of the six villages referred to by the Hon'ble Member in the Calling Attention Notice, there is no scarcity for drinking water at Mallapura village, Davangere Taluk. The village has a population of 356 and there are 2 drinking water wells, one public and one private; both supplying adequate water.

In the other 5 villages, there is scarcity for drinking water in varying degrees. Village-wise details are as follows :

**1. Yeragunte :**

There is a population of 792 at the village. Of them 130 are Harijans. There are two drinking water wells. One for the general public and another in the Harijan colony. The former well has dried up and the latter is supplying adequate water to the Harijans. The villagers are fetching water from irrigation wells, which are situated at a distance. The Deputy Commissioner has proposed to provide a bore well to the village. The Geologist has selected a site.

**2. Nerlige :**

The village consists of a population of 1,315 inclusive Harijan population of 262. There are 2 general wells and one well in the Harijan colony wherein there is only 2 feet of water. In the 2 general wells also there is meagre water supply. The villagers are using water from these wells and also from the private bore wells sunk in village. Action has been taken to sink a pit well in the tank bed for the benefit of cattle. The Geologist has selected a site for sinking a bore wells.

**3. Siddapur :**

The village, which has a population of 524 of whom 92 are Harijans, is having 3 drinking water wells. Two of them were deepened with Rig Machine. But water was not tapped. The other well too was deepened by blasting. Water tapped thereby could sustain the villagers for about 2 months and it has gone dry again. The villagers are using water from the irrigation wells which are situated at a distance. The Geologist has selected a site for sinking a bore well.

**4. Anagudu :**

The village has a population of 1,795 of whom 380 are Scheduled Castes/Scheduled Tribes people. There are 7 drinking water wells besides a National Rural Water Supply Scheme to meet the needs of the village. But only 3 wells are of use to the villagers since two wells are dried up, another one is under repairs and the remaining one is not useful. The PHE Department has fixed up pump set to the well and awaiting servicing by the Karnataka State Electricity Board to start functioning. With a view to ensure adequate supply of water through the National Rural Water Supply Scheme, it is proposed to sink another bore well. The Geologist has selected a site for the purpose.

**5. Rudranakatte :**

The village has a population of 367 inclusive of 191 Scheduled Castes/Scheduled Tribes people. There are 3 drinking water wells already and one more well is under execution. Of the 3 existing

wells, one is dried up and water in the other two has gone down. Action has been taken to deepen one well near the school building with the low Speed Rig which is working in a neighbouring village.

The Chief Engineer, MI and PHE, South Zone has taken action to despatch a Rig immediately to take up the bore wells at Yergunte, Nerlige, Siddapura and Anagadu. Necessary funds have been provided for the purpose.
